Interest on school bonds	850.
Town notes	1,000.
 Total	 \$28,318.82

John C. Smith

WATERBORO TOWN REPORT.

Auditor's Report.

I. Edward E. Libby, Auditor of Waterboro, certify that I have made a careful audit of the accounts of the Selectmen and Treasurer and find them correct. The Selectmen have shown me a bill for each order drawn and the Treasurer has shown me a cancelled check, a receipt, or other proof of payment for every order paid.

Large bills in the Snow, Poor and Incidental Departments have caused an increase of the town debt of \$1,744.33 as shown by Treasurer's report. \$300. paid for insurance on the new school building caused the overdraft in the Incidental department.

There is due from the State \$96.00 on account of Pensions and Mothers Aid and Dayton owes for the expense of Alphonso J. Hill.

The debt of the town, outside of school bonds, is:

Four notes to Limerick National Bank	4,500.00
Note to May Andrews Roberts	700.00
Total	\$5,200.00

In the school building department, the following is a correct statement;

Received from sale of 251 town bonds	\$27,000 00
interest on deposits	22 09
Total	27,022.09

The Treasurer has shown me paid checks for 26,973 83

His Bank statement shows, Balance \$48.26

Respectfully submitted,

Edward E. Libby,

AUDITOR.

WATERBORO TOWN REPORT.

Condition of School Buildings.

Our school buildings are in good state of repair as concerns their general condition. During the past summer a new out-building was erected at the Carll's Corner School, in conformity with the legal requirements for such buildings. All our rural schools now have out-buildings which meet these requirements. There is still opportunity for improvement in the matter of lighting, heating and ventilation. None of these bulidings are up to standard in these respects. In the way of general repairs may I suggest that the school at East Waterboro will soon need to be painted. A new stove is very much needed at the North Waterboro school.

Needs for the Coming Year.

Although furniture has been purchased to meet immediate equipment. In the high school we have thirty class room desk chairs of modern, up-to-date type, which have proved highly satisfactory. In the assembly hall we have barely seats enough to accommodate the student body. It is necessary that more of these seats be purchased in sufficient quantities to allow the use of the hall for public gatherings. Our laboratory will need chemistry apparatus, chemicals and a chemistry table. These will cost at least \$200.00. We also need class room chairs for this room. It will also be necessary to make additions to our library. Other general needs are tables for the class rooms and furniture for the office. These things should be kept in mind in making appropriations on town meeting day at which time recommendations will be made as to the amounts of money required.

Financial.

A glance at the financial statement will show that the money appropriated last spring has been judiciously used. It will be seen that there is an unexpended balance in every account with the exception of appropriation for repairs, which has been overdrawn seventy-five cents. This does not, however, indicate that there should be any cut in appropriations. In some instances more money will be asked for. It must be borne in mind that our high school opened late in the fall, a fact which accounts for the unexpended balance in that account. It will be necessary to maintain that school next year the additional number of weeks to make up the time lost by opening so late. It should also be remembered that our teachers are not receiving salaries which will hold, for any length of time, teachers of good training and experience. Furniture for the new building has not been paid for, owing to lack of appropriation to cover the same. It will be necessary to raise money to cover this item.

It will be noticed from the financial statement that we do not receive as much money from the State under the new method of apportionment as was formerly the case. Under the present scheme all money received from that source comes in one sum

WATERBORO TOWN REPORT.

and is known as the "State school fund." This money may be used for any school purposes for which it may be needed. It is therefore necessary for the school officers to use it according to their best judgment. In connection with this new apportionment law may I also call the attention of the voters to the provision which states that, in the future, all unexpended balances in the various school accounts must be credited to those accounts for the coming school year.

Conclusion.

During the past year there has been a fine spirit of co-operation between the citizens and those directly connected with the management of the schools. I wish here to thank those individuals who have contributed either in service or in money towards meeting needs involved at the new building. I would also mention especially a gift of one hundred dollars and a valuable collection of books for the high school library, from Mrs. Annie King Hamilton, of Wakefield, Mass. The money gift has made possible the purchase of six chairs and a very attractive library table. Citizens are urged to visit our new building, become acquainted with our school problems, and co-operate further with the school officers in their efforts to keep a high standard in the Waterboro schools. It would be superfluous to say that we have a building of which the town may justly be proud. It speaks for itself.

In conclusion I wish to express to the superintending School Committee, to the teachers, and to the citizens of the town my appreciation for their loyalty and support during the past year

Respectfully submitted,

MAYNARD E. WRIGHT,

Superintendent of Schools.

REPORT OF HEADMASTER, WATERBORO HIGH SCHOOL

Waterboro, Maine, Jan. 31, 1923.

To the Superintendent of Schools:

My Dear Mr. Wright: It is with the greatest of pleasure that I submit this, my first, and the first annual report of the Waterboro High School.

Our school opened on October ninth with a total enrollment of thirty-four pupils and since that time one more has enrolled, making a total of thirty-five pupils.

These pupils are divided up as follows: Six seniors, eight juniors, nine sophomores and twelve freshmen.

Two courses of study are open to the pupils of the high school, the College Course and the English Course. Out of the total number of students six are taking the College Course and

REPORT OF HEADMASTER, WATERBORO HIGH SCHOOL

Waterboro, Maine, Jan. 31, 1923.

To the Superintendent of Schools:

My Dear Mr. Wright: It is with the greatest of pleasure that I submit this, my first, and the first annual report of the Waterboro High School.

Our school opened on October ninth with a total enrollment of thirty-four pupils and since that time one more has enrolled, making a total of thirty-five pupils.

These pupils are divided up as follows: Six seniors, eight juniors, nine sophomores and twelve freshmen.

Two courses of study are open to the pupils of the high school, the College Course and the English Course. Out of the total number of students six are taking the College Course and

WATERBORO TOWN REPORT.

29 the English Course.

As you already know, our school has been approved as a Class A high school for 1923. Whether we maintain that classification for 1924 depends upon three conditions:

First, the maintenance of experienced teachers of high standard who have graduated from a four-year college course and have obtained a degree.

Second, increased equipment.

Third, we must meet the other requirements of a Class A high school, ie, up-to-date text books, reference books, and the completion of standard requirements.

The teachers are all graduates of colleges and have degrees. It is a benefit to any school to keep its teachers several years, if possible.

As regards equipment we are in need of a laboratory table and chemicals enough for the completion of 40 experiments by ten pupils. We also need general science equipment and a few additional laboratory supplies for physics. We also need closets in which to keep the apparatus. Then, too, we shall need various other text books, an encyclopedia, a current newspaper and a French newspaper.

We are very fortunate to have in our village a woman, Mrs. Ruth Walsh, who is thoroughly versed in music and who is capable of directing music in the schools. She has already accomplished remarkable results and it is hoped that you may be able to secure her services for the remainder of this year and the coming year. I consider the introduction of music in our schools a very progressive measure.

Now as to our accomplishments. In the mathematics classes we have completed half the year's work and the required subjects. In general science we have completed fifteen experiments in the laboratory and the required amount of textbook work. In physics we have already completed 25 of the necessary 40 experiments. In history we have covered 400 pages of reading matter together with 10 maps. In our community civics class we have nearly completed our present text-book.

In the first year English class the books read are Silas Marner and Julius Caesar. Practical exercises in sentence structure have been given. "The Two Years' Course in English Composition" by Hanson is the text used. The second year class has already completed "Ivanhoe" and "The Merchant of Venice." One day a week is spent in the study of structure of composition, while another day a written composition is required. In the third year we have completed "The Tale of Two Cities" and "The Autobiography of Benjamin Franklin." Two days a week are spent on the study of American Literature.

In the first year French class, 50 of the 101 required lessons in Chardenal's Complete Course have been completed.

"La Tache du Petit Pierre" and "Columba" have been read by the second year French class. Twice a week written work in French prose is required. This is indirectly a review of French grammar.

WATERBORO TOWN REPORT.

The text used in the first year Latin class is "Elements of Latin" by Dooge. Four out of a total of six required orations have been completed by the junior Latin class.

We have given five debates to which the public have been invited. We also held an unveiling, which was largely attended.

We have also a boys' and girls' basketball team, which have been fairly successful, considering that we had only a few to select from.

In our campaign to get subscribers for The Ladies' Home Journal, and thus get money for our athletic association, 46 subscriptions were sold, netting \$23.00 for the association.

We expect to organize a baseball team soon and should have a pretty good team.

We have recently started rehearsals for a Junior Play which will be put on in March.

Our school paper, "The Waterboriaian" is a huge success. The paper is run by the students of Waterboro High School.

I learn that we have 16 candidates for the high school next year. This will make a total enrollment for 1923-1934 of 40 pupils, which will necessitate more seats.

In closing, I wish to thank the building committee and the school board for their splendid co-operation and their support in helping me in my efforts to make Waterboro High School the best in New England.

Respectfully submitted,

B. R. GRAVES,

Headmaster.

NEW GOODS FOR 1923.

We shall publish March 20th.. 1923 our new Price List of goods for our Spring and Summer Sale and shall make prices much LOWER than can be bought of the big chain stores, or elsewhere. Our sales from October to December, 1922 convinced us that the public appreciate a store where they can buy their goods at the right price.

We thank you.

Call for or send a postal for our NEW LIST.
